3,00 Dia(s) - 21,00 Horas

### Introdução

The ITIL 4 Foundation course is the entry level course for certification in IT Service Management (ITSM). This course covers the latest version (4 released 2019) of ITIL®. ITIL has led the IT Service Management (ITSM) industry with guidance, training and certification programmes for over 30 years. ITIL 4 brings ITIL up to date in 2019 by re-shaping much of the established ITSM practices in the wider context of customer experience, value streams, and digital transformation, as well as embracing new ways of working, such as Lean, Agile, and DevOps.

The key components of the ITIL 4 framework are the Service Value System and the Four Dimensions model.

Service value system (SVS) represents how components and activities of the organization facilitate value creation through IT-enabled services. Core components of the ITIL SVS are:

- ITIL service value chain;
- ITIL practices;

Four dimensions apply to each component of the SVS. They are:
